

Zoppas Industries supplies heat exchangers, control panels, pumps, valves and other devices that are used in heat transfer processes upon request skid-mounted.

Designed to meet the customer's process specifications. Also available in the ATEX / IECEx version for hazardous areas.

## Applications

- Fuel gas
- Natural gas
- Nitrogen
- Hydrogen
- Fuel oil
- Water
- Hydrocarbons
- Petroleum
- Steam

## Features

Mains voltage: Up to 690V.

Power: 10 - 3000 kW with working temperatures up to 800°C.

## Main options available:

- Process electric heaters (Exchangers or Electric Duct Heaters)
- Valves
- Pumps
- Temperature and pressure measurement systems
- Electrical control panels
- Self-bearing support structure
- Pre-wired "turn-key" solutions
- Over temperature and over pressure cut-out systems
- Start-up and commissioning services are available

## Certifications:

ATEX, IP 66, PED, ASME U
